- Total revenue

SQL Query:

```
SELECT SUM(price * quantity) AS total_revenue
FROM iceberg.sales_schema.sales;
```

OUTPUT:

```
trino:sales_schema> SELECT SUM(price * quantity) AS total_revenue
                 -> FROM sales;
 total_revenue
---------------
      110000.0
(1 row)
```

- Category-wise revenue

SQL Query :

```
SELECT category, SUM(price * quantity) AS revenue
FROM iceberg.sales_schema.sales
GROUP BY category;
```

OUTPUT:

```
trino:sales_schema> SELECT category, SUM(price * quantity) AS revenue
                 -> FROM sales
                 -> GROUP BY category;
  category   | revenue
-------------+----------
 Electronics | 100000.0
 Fashion     |  10000.0
(2 rows)
```

- Top-selling products by quantity

SQL Query

```
SELECT product, SUM(quantity) AS total_quantity
FROM iceberg.sales_schema.sales
GROUP BY product
ORDER BY total_quantity DESC;
```

OUTPUT:

```
trino:sales_schema> SELECT product, SUM(quantity) AS total_quantity
                 -> FROM sales
                 -> GROUP BY product
                 -> ORDER BY total_quantity DESC;
 product | total_quantity
---------+----------------
 Shoes   |              5
 Laptop  |              2
(2 rows)
```
